RE: Letter of Recommendation For Prasanna Kumar Reddy Sabbella

To Whom It May Concern,

My name is Bradley Mollman and I am a Project Engineer III with Fedex Supply Chain. I was responsible for mentoring Prasanna during his internship with us spring of 2022. Prasanna excelled at the challenges and task that were presented to him. One such task that was required of him was to estimate the number of trucks it would take to relocate product from one distribution center to another. This task required Prasanna to analysis the current inventory levels as well as the number of pallets required to transfer the product. Since the quantity of product that would fit onto a pallet was unknown Prasanna used data that he collected from another project he was tasked with and developed a pallet optimization program using Python coding. Using the coding he was able to determine the optimal number of products that could fit onto a pallet and then estimate the number of trucks and time required to transfer the product. This became crucial in gaining our external customers confidence in our ability to timely transfer the product without shutting down the distribution center.

Prasanna was also part of a team that that was responsible for validating the automation equipment that was recently installed in the new facility. He experienced several challenges during this process in which he excelled at communicating the issues with not only the internal team but also the external resources needed to correct the problems that arose during the validation. This allowed the process to continue and issues to be addressed in a timely manner. His involvement in the process was crucial to its success. His ability to communicate and develop relationships with his teammates was exemplary.

To conclude, I would like to reiterate my strong recommendation for Prasanna Kumar Reddy Sabbella. If you have any further questions regarding Prasanna's ability or this recommendation, please do not hesitate to reach out to the contact information provided below.

Sincerely,

Bradley Mollman

Project Engineer III

Fedex Supply Chain
